BREAST CANCER®

PRACTICAL CONCERNS

## Questions to ask about treatment for metastatic breast cancer

Use the list below to help guide a conversation with your care team about what treatments they recommend for you, and why.

- Why do you believe this treatment is the best option for me right now?
- What are the benefits of this treatment?
- How is this medicine given?
- How long does each treatment appointment last?
- What are the short-term side effects?
- What are the long-term side effects?
- Will this medicine prevent me from enjoying daily activities?
- What can I do to make sure I can do the things I love while I take this medicine?
- What side effects mean I should call you immediately?
- If this treatment does not work, or makes me feel too sick, what are my other options?
